Advisor Profile – Real Estate Strategy & Investment

Who We Are

Our team provides direct access to senior experts with board-level governance experience, CFO-level financial leadership and private equity discipline. In addition to deep experience in corporate finance, restructuring and M&A, the team has also advised on high-value real estate transactions in Serbia, including work related to the IMT New Belgrade development zone, exposure to Delta Real Estate's development portfolio, Finvest, and other strategic mandates, as well as involvement in hospitality-sector acquisition processes.

Real Estate & Development Expertise

The team provides advisory support across the real estate investment cycle, with a focus on sourcing high-value locations, evaluating commercial potential and structuring transactions for international investors. Our mandates span the Serbian real estate and hospitality sectors, supported by strong pipeline visibility, market intelligence and privileged access to off-market opportunities and proprietary deal flow. The team delivers investor-grade analysis, disciplined transaction execution and a clear understanding of regulatory and commercial dynamics, enabling clients to navigate the market efficiently and secure well-structured, high-potential assets.

Core Strengths

Governance & Regulatory Insight

The team includes a President of the Audit Committee and Board Member of a regulated financial institution, as well as a Board Advisor within the same bank. This provides deep understanding of Serbian regulatory requirements and risk management frameworks both essential for compliant development planning and tax-efficient transaction structuring.

CFO- Level Financial Leadership

With extensive experience in CFO and Group CFO roles, the advisors bring strong capabilities in financial strategy, capital structure optimization, budgeting, forecasting, and IFRS reporting. Their operational background ensures that development proposals and investment cases are both financially sound and practically implementable.

Private Equity, M&A & Distressed Asset Experience

The team has supported major M&A processes across multiple sectors working alongside investment banks, private equity funds, international advisors, and legal teams. Their experience includes transaction structuring, investor-grade financial materials, due diligence coordination and valuation modeling. Additionally, the team participated in the acquisition of distressed debt portfolios from the Deposit Insurance Agency (AOD), including large claims from bankrupt banks and state-managed assets — providing deep insight into Serbia's insolvency, enforcement, and asset recovery frameworks. This expertise directly supports pre-sale structuring, asset quality assessment, and tax-optimized exit strategies.

Analytical Rigor & Multinational Standards

With a foundation in Big 4 assurance and experience in multinational corporations, the team delivers high-quality analysis, strong documentation, and disciplined financial processes aligned with international standards — a key requirement for foreign investors and cross-border transactions.

What We Do

Location sourcing & market access: Identification of high-potential sites and assets, including off-market opportunities and proprietary deal flow.

Commercial & financial assessment: Investor-grade feasibility analysis, financial modeling, and commercial due diligence.

Transaction structuring: Support in negotiations, deal structuring, and alignment with regulatory and planning frameworks.

Stakeholder coordination: Engagement with landowners, developers, authorities, and financial institutions.

Why Investors Work With Us

Senior-level expertise and hands-on involvement

Access to proprietary deal flow and off-market opportunities

Deep understanding of Serbia's regulatory, planning, and commercial environment

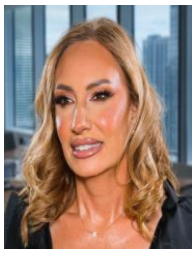

Strong analytical discipline and investor-grade execution

Proven track record across corporate finance and real estate transactions
